ABOUT US

TEK: the natural and healthy solution for hair and body.

Love for nature and a great attention to hair care have always been the foundation of our philosophy. Each product is handcrafted and made only from natural materials such as wood, which is ideal for healthy, beautiful and shiny hair.

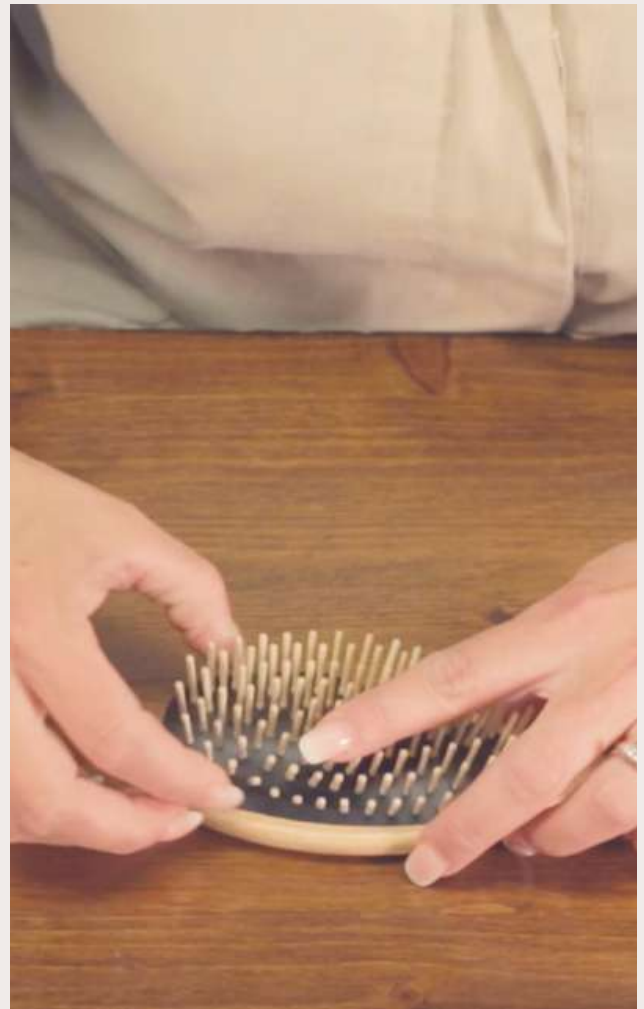

All TEK brushes and combs are 100% handmade in Italy, in fact they are rigorously manufactured, assembled and boxed in Italy by skilled hands; this tradition of craftsmanship is synonymous with great attention to detail and high quality standards.

TEK stands out for the environmental awareness through which it operates throughout the production chain: in fact, the woods come from responsibly managed forests and it is used a natural rubber made from non-petroleum rubber. The handmade finishing part is made through the use of linseed oil. Even the packaging is made of natural cardboard made according to the Well Managed Forest principle.

TEK products are certified by FSC®, Forest Stewardship Council®, a label that identifies products that contain wood from forests that are managed properly and responsibly according to strict environmental, social and economic standards. In March 2017, TEK added the prestigious B Corp® certification and in 2018 the VeganOk one.

WHY TEK

THE PROPERTIES OF TEK BRUSHES

- They massage the skin
- They are antistatic
- They reactivate blood circulation
- They strengthen the hair bulbs
- They absorb excess sebum and impurities deposited on the hair
- They are hypoallergenic

The use of wood to make the handle and teeth allows hair to be combed without tearing or damaging it and avoids electrifying it.

The choice of natural rubber to support the wooden pins also allows for soft and comfortable brushing, scalp massage and thus reactivation of blood circulation, strengthening the hair bulbs.

Teeth made of wood, unlike plastic, are perfectly turned and polished therefore without any imperfections that could damage the hair.

Our goal is to continue the search for more and more environmentally friendly materials to maintain current high performance while reducing environmental impact.

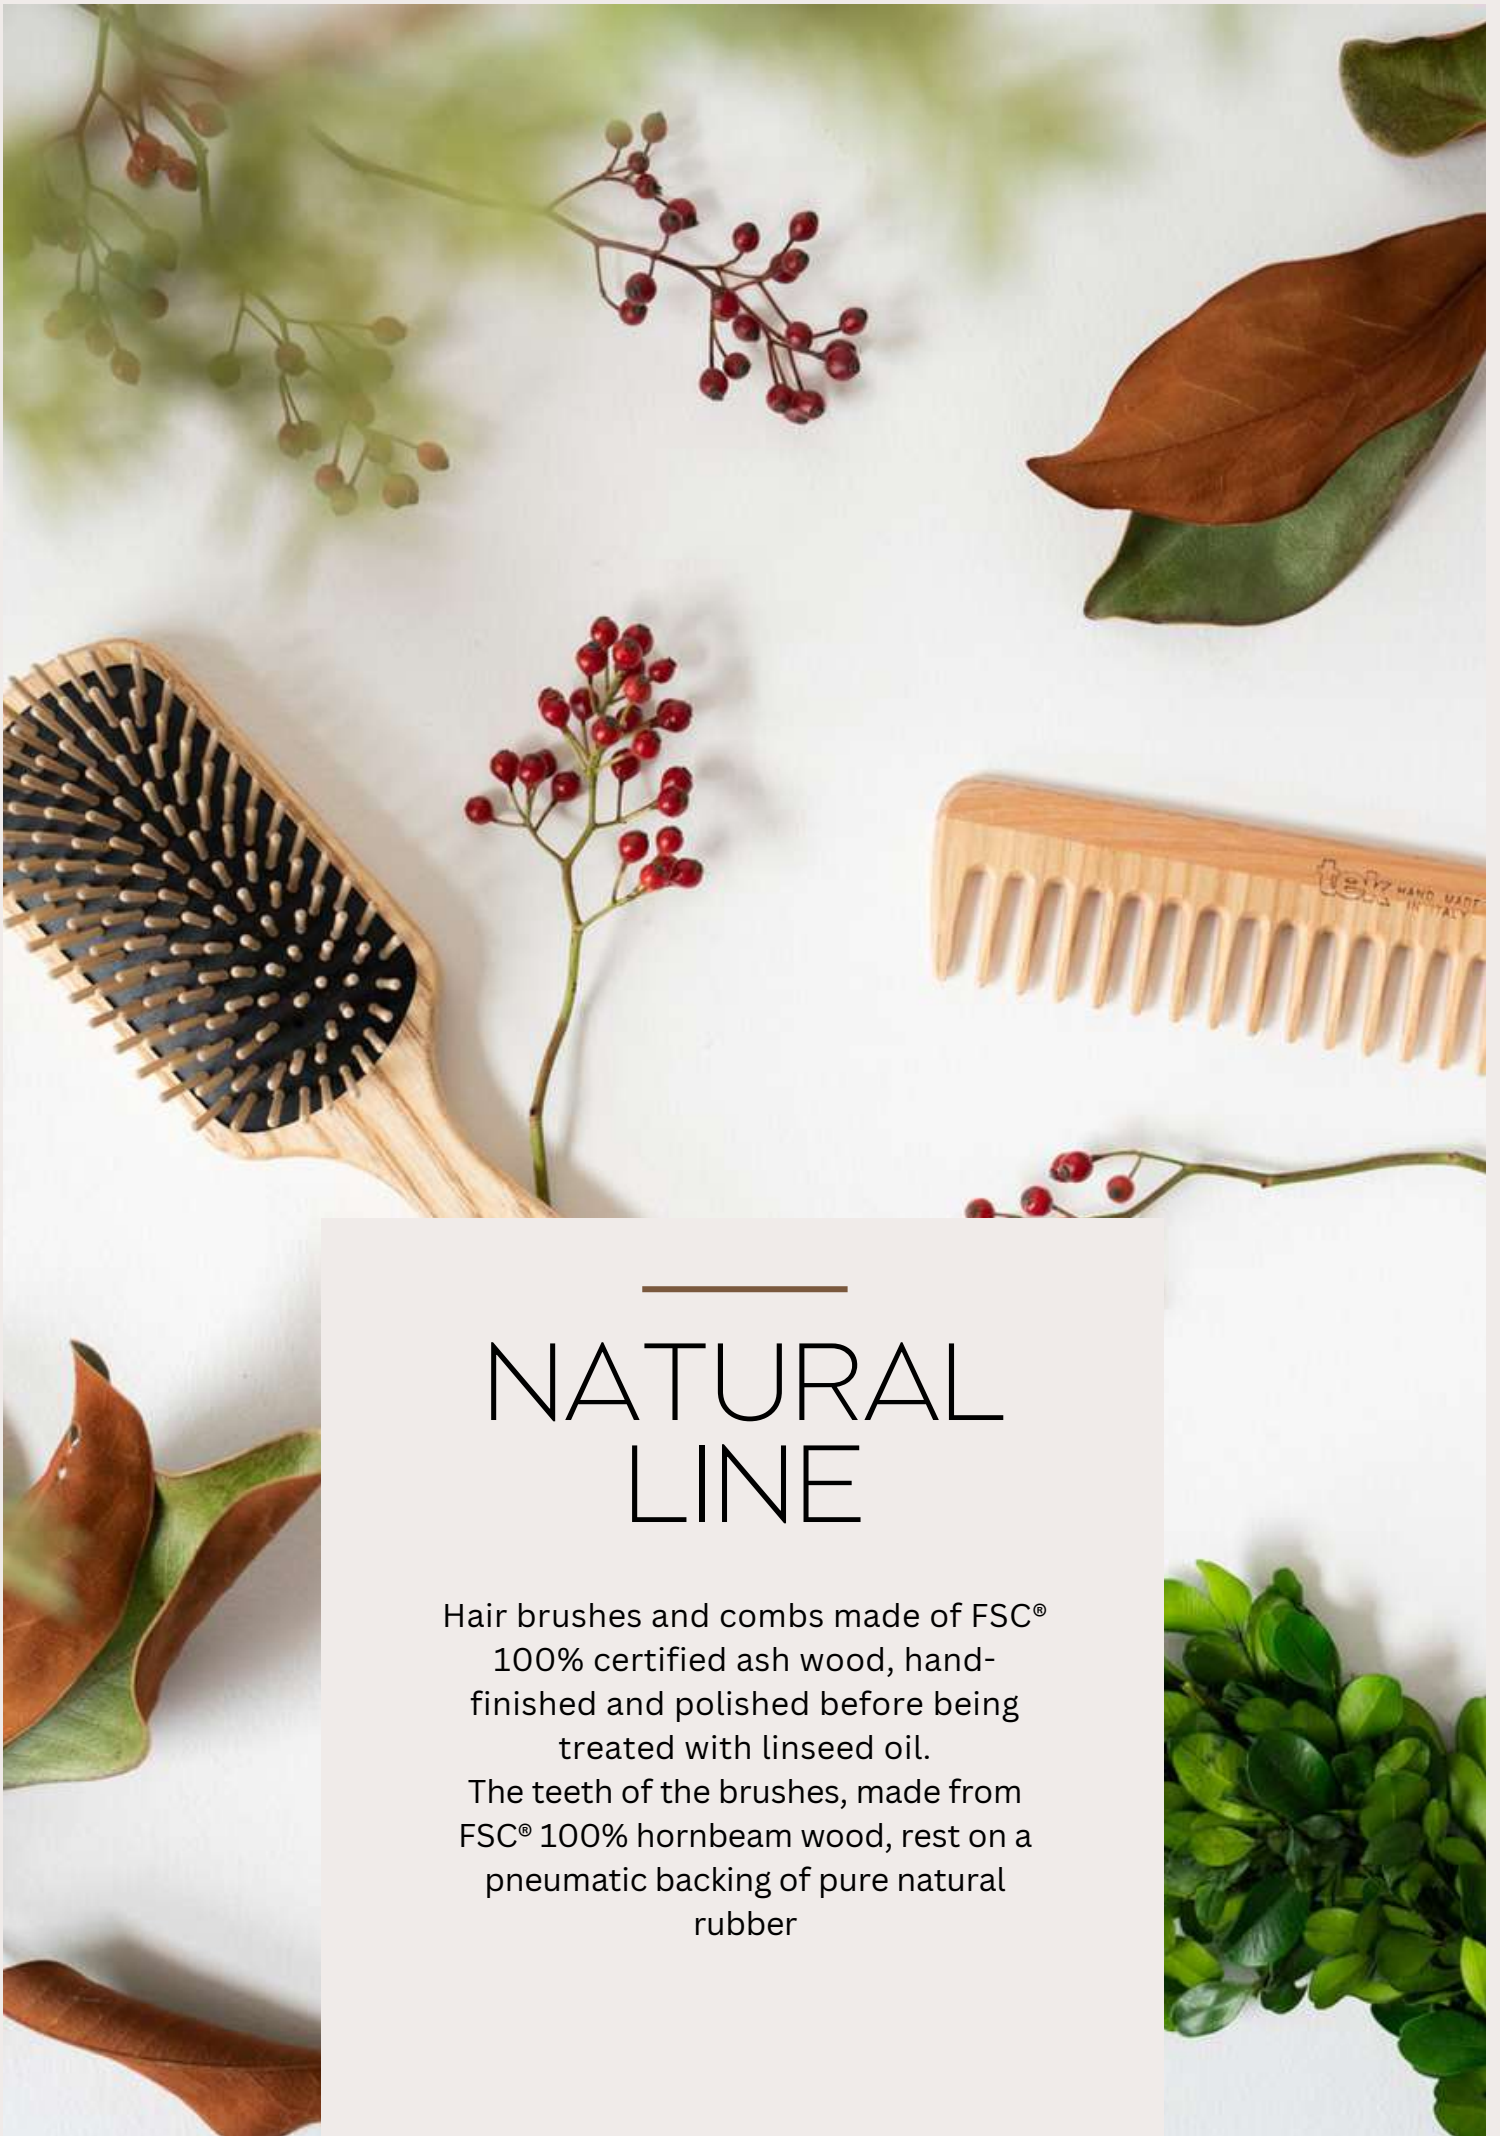

TEK products have always been welcomed with great enthusiasm abroad, where the Made in Italy label is a guarantee of high quality and beauty. TEK, present in more than 80 countries located on five continents, is distributed through its e-commerce and at specialized outlets such as:

- Professional hairdressers
- Perfumeries
- Bio-profumeries
- Herbalist shops
- Pharmacies
- Concept stores
- Spas & Beauty Salons

NATURAL LINE

Hair brushes and combs made of FSC® 100% certified ash wood, hand-finished and polished before being treated with linseed oil. The teeth of the brushes, made from FSC® 100% hornbeam wood, rest on a pneumatic backing of pure natural rubber

VEGAN BRISTLES

TEK brushes with vegan bristles are made from 100% FSC-certified ash wood. Given the special ability of vegan bristles to penetrate deep into the hair, these brushes gently detangle the hair while loosening all knots and giving extreme shine and volume. They are suitable for fine or sparse hair and are particularly good for extensions

VEGAN BRISTLES

BODY LINE

TEK body brushes are made only from natural and biodegradable elements.

They are available in two versions: tampico fiber and natural bristles.

The "Tampico" fiber (stiff) is made from the leaves of the Mexican Agave tree: it is ideal for deep removal of skin impurities and dead skin cells. Natural bristle (soft) is particularly suitable for gentle massage and sensitive skin
